

Your AI. At home on Mac.

The approved Switch identity, translated into a focused macOS companion.

Just as clear after dark.

A proposed dark appearance. The identity and state meanings stay the same.

One popover. Six honest states.

A connection label, a useful next action, and a shape cue that works without motion.

Switch / Concept 01 03

Six states. In the dark, too.

Neutral healthy states, distinct pause and managed marks, and amber only for attention.

Three steps. A clear next action.

Sign in with your browser, approve the connection, and find Doorman in the menu bar.
